

3rd National NCD Summit

Synergizing efforts in Diabetes Care at the Tertiary Level

12 August 2015; Jacaranda, India Habitat Center, New Delhi

DRAFT OUTLINE PROGRAMME

0900-1000 Registration

1000 –1100 Hrs Inaugural Session

1100-1200 hrs Plenary Session 1 – NCD Journey

Session Overview: Session sets a context for the day's summit as how critical is to act at multidisciplinary level efficiently to tackle the increasing burden of non-communicable diseases and reduce the risk factors. Apart from giving a global and national perspective of NCDs and more specifically with tertiary level institutions session also highlights the relevance and means to manage diabetes and its complications in particular.

1200 -1300 hrs Panel Session 2 - Public Health and tertiary care to challenge NCDs: A Joint Collaboration

Session Overview: Session brings experts of national repute to deliberate on the innovative approaches and strategies to tie up tertiary care with public health. Need for an integrated approach towards building the capacity of primary and secondary level cadre is critical to manage the emerging NCD burden. Successful models and the emerging role of a robust management information system (MIS) and use of mobile health technology will be discussed at length in this important session.

1300 – 1400 hrs Networking Lunch Break

1400 - 1500 hrs Panel Session 3 – Technology and Communication tools for Management of NCDs: Community-based solutions to reduce burden

Session Overview: Acknowledging some of the meaningful and impactful approaches practiced in community setting towards managing risk factors and NCDs session aims to introduce few successfully implemented interventions at community level to the participants. It is expected that these scalable approaches can be replicated and adapted by Central and State Governments in India to strengthen their ongoing efforts to control the menace of the NCDs.

3rd National NCD Summit

Synergizing efforts in Diabetes Care at the Tertiary Level
